Note:

REASONS FOR THE OPEN OFFER AND USE OF PROCEEDS

The Group is one of the leading manufacturers of monocrystalline silicon solar ingots, measured in terms of production output and sales, in the PRC. The Group is principally engaged in (i) manufacturing and sales of monocrystalline and multicrystalline silicon solar ingots and wafers; (ii) processing of silicon solar ingots and wafers; (iii) manufacturing and sales of photovoltaic cells and modules; and (iv) design and installation of photovoltaic systems.

The Group has encountered difficulties in its businesses and has suffered a significant deterioration in its financial performance since 2012. Based on the unaudited results of the Company for the six months ended 30 June 2012 as set out in the Company's interim report 2012, the Group recorded a loss attributable to Shareholders of approximately RMB685.5 million, as compared to a profit attributable to Shareholders of approximately RMB113.3 million in the corresponding period in 2011. As set out in the annual report of the Company for the year ended 31 December 2011, the Group recorded an audited profit attributable to Shareholders of approximately RMB44.2 million, as compared to an audited profit attributable to Shareholders of approximately RMB211.4 million for the year ended 31 December 2010.

In December 2012, the Company raised approximately HK\$89.2 million under the outstanding loans. As at 31 December 2012, the Group had borrowings amounting to approximately RMB1,813 million (which is equivalent to t.8(sc)-528.4(.8(ppr)17.9(oximately)-528.4(HK million (which is equivalent to HK\$83 million) which will be due and immediately repayable in March 2013. Upon repayment of the said US\$10.71 million, the Group will still have outstanding loans of approximately RMB1,730 million (which is equivalent to HK\$2,122 million). The Directors consider that the repayment of the outstanding loans by using its internal resources may have a negative effect on the Group's liquidity and working capital, which may in turn reduce the Group's flexibility in its business development. On the other hand, the Directors are o.8(f)-242.4(the)-242.4(view)-242.3(that)-242.4(r)17.9(epa by additional bank borrowings will increase the Group's overall gearing ratio and burden the Group with increased interest expenses, thereby exposing the Group to greater financial risk. Therefore, the Directors consider that it is in the interest of the Company to raise funds to repay the outstanding loans.

The Directors have considered other alternative fund raising methods such as

The estimated net proceeds from the Open Offer will be approximately HK\$250 million (after deducting the costs and expenses in relation to the Open Offer). The Group will apply the entire net proceeds to repay its current outstanding interest-bearing bank

The Group has gained a leading position in the mono-crystalline silicon solar ingot and wafer manufacturing industry in terms of technology, product quality and quantity. The products of the Group are the only mono-crystalline silicon solar ingots in the PRC to which national products exemption from quality surveillance inspection has been granted. The photovoltaic conversion efficiency of its monocrystalline silicon products is also higher than the industry average. Apartsr(le(nationat)-412P-typoof)etBo(.1(pr)17.9(odu,nat)-412e7oo

In order to survive in the current severe market situation, the Directors take the view that the Group has to be prudent and conservative in managing its financial arrangements to ensure it has sufficient capital to face on-going challenges. The Company intends to repay part of the Group's outstanding borrowings by the funds raised under the First Open Offer and the Open Offer so as to reduce its finance costs whilst maintaining a healthy level of liquidity and working capital, which will enable the Group to seize any suitable business opportunities when the market rebounds. Further, the Company may explore and seek to, subject to market conditions and definitive agreements having been entered into, raise equity financing by way of a placing, possibly up to US\$6 million before June 2013, to further strengthen the Group's liquidity and working capital. However, as of the Latest Practicable Date, there have been no discussions, negotiations or arrangements in respect of terms of and a timetable for the aforesaid fund raising exercise and no contracts or definitive agreements have been entered into in respect of such fund raising exercise.

Looking forwards, the Directors will adopt the following strategies and measures to retain customers and win new clients under the current down cycle:

1. Capital expenditure will be suspended in order to conserve cash and reduce cash outflows, save for the necessary investment in the research and development of products and the enhancement of the quality and efficiency;
2. Continue to maintain quality while actively seeking to balance the need for cost reduction in the current environment;
3. Improve the product mix, by increasing the sales portion of N-type products which provide higher and more efficient conversion efficiency than the traditional P-type products. The N-type products are mainly targeted to Japanese customers;
4. Co-operate with long term investors to construct solar energy power generation systems, minimising the cash outlay of the Group;
5. Tighten the credit control by focusing more on selected quality customers to build up long-term and steady sales. This also helps to establish long term steady market distribution channels; and
6. Impose stringent control of expenditure and increase the performance-based incentives awards for staff. Apart from reducing the administrative management fees, we will decrease the production and selling expenses and cost of overall operation and per unit production to enhance the overall profitability.
